

DEVABALAN R

Passionate learner with a strong ability to acquire new knowledge quickly

6380109648 devabalan1983@gmail.com devabalan-r-59067a19a PONDICHERRY

PROFILE

Full-Stack Developer (Java/Spring Boot & Angular) with 2.5 years of experience developing responsive applications and microservices. Skilled in cloud technologies, CMS integrations, prompt engineering, and building agentic AI solutions.

SKILL

Programming	Backend	Frontend	CMS & Cloud
- Java - JavaScript - Python	- Spring Boot - Microservices - Restful APIs - Node.js	- Angular - Angular Signals - NgRx - RxJS - HTML/CSS	- Contentful CMS - Contentful MCP - MicroSoft Azure

WORK EXPERIENCE

	<u>Tata Consultancy Services</u>	(2.5 Years)
●	Project : Marks & Spencer Plc 30-May-2024 - 19-Aug-2025 Engineer	
	Technical Skills : Java , Spring Boot	
	Responsibility:	
	- Developed and enhanced core backend modules using Java and Spring Boot to support scalable application services. - Provided operational support for production systems, troubleshooting and resolving critical BAU (Business-As-Usual) issues quickly.	
	Innovation / Key Contribution :	
	- Designed an AI-driven security automation workflow integrating GitHub Actions, Maven, and Snyk for early vulnerability detection. - Automated dependency upgrades with AI-assisted remediation, reducing manual fixes.	
	Achievements :	
	<i>Awarded "Star of the Month" for consistent contributions to Tech BAU (Business-As-Usual) activities, ensuring smooth operations and timely deliveries.</i>	
●	Project : Rogers 19-Aug-2025 - current Angular Developer	
	Technical Skills : Angular, Javascript, NgRx , Java ,Contentful	
	Responsibility :	
	- Implemented new customer purchase workflows in Angular using NgRx for device catalogs, SIM selection, and package configuration, boosting in-store sales efficiency. - Integrated Contentful CMS with Angular, enabling dynamic content updates, eliminating hardcoded asset updates, and empowering marketing teams to manage content independently. - Created reusable UI component libraries using Angular Signals and RxJS, enforcing design system standards and accelerating sprint deliverables.	
	Innovation / Key Contribution :	
	Contentful SPOC & MCP Integration: Served as the single point of contact for Contentful CMS across the team, while actively driving the integration of Contentful Model Context Protocol (MCP) to enable AI-driven dynamic workflows. Architectural Optimization: Refactored Contentful data mapping logic from legacy index-based positioning to a robust ID-based mapping structure using Angular Signals and strict coding standards.	
	Achievements :	
	<i>"Star of the Month Award": Awarded for architecting the seamless migration of Contentful mapping logic, establishing high coding standards, and resolving critical data rendering issues.</i>	

EDUCATION

Bachelor of Technology (B.Tech)
Computer Science and Engineering
Sri Manakula Vinayagar Engineering College
2019 - 2023 (77.8%)

Databases & Tools	AI & DevSecOps
- MongoDB - Git - Postman - Dynatrace - Pega - SonarQube	- Prompt Engineering - GitHub Copilot - Agentic AI - GitHub Actions - Snyk - Maven

CERTIFICATIONS

Pegasystems :
Pega Certified Senior System Architect 8.7
Proficient in designing and implementing scalable business process management solutions using Pega.
Microsoft Certified:
Azure Developer Associate
Gained expertise in building, deploying, and securing cloud applications on Microsoft Azure.
Azure Security Engineer Associate
Skilled in implementing threat protection, managing identity, and securing cloud workloads.
Claude Certified Developer - Foundations
Skilled in building, integrating, and deploying AI solutions using the Claude API, prompt engineering, agentic workflows, and MCP.
GitHub Certified: Copilot
Proficient in AI-assisted development, prompt engineering, and leveraging GitHub Copilot to optimize software delivery and code quality.

PROJECTS

Basic CRUD Application with Angular and API.
04/2022 pondicherry
Skills Demonstrated: API Integration, Front-End Development
MEAN Stack Task Management Application
05/2022 pondicherry
Skills Demonstrated: MongoDB, Express.js, Angular, Node.js, RESTful API Integration, User Interface Design.
AI-powered automation workflow for Maven dependency upgrades
07/2025 chennai
Skills Demonstrated: Artificial Intelligence (Mistral AI), GitHub Actions, CI/CD Pipelines, Snyk CLI, Maven Dependency Management, Python Scripting, Vulnerability Detection, Automated Reporting, DevSecOps Integration.
